We have an IEM rack with a 24ch split snake. Input list reflects the labels on our split snake. Rack stage position can be adjusted to whatever makes the most sense.

We will need 2 long XLR cables to run lines for Todd's stereo IEM pack.

- Seth (lead vox) brings his own wireless mic and stands
- Kire has an XLR out from his pedalboard
- Marty has an XLR out from his pedalboard
- Bass amp has an XLR out
